

Glider flight and quad ride

day 1 Arrival of participants and accommodation in hotel. Dinner and overnight stay in hotel.

day 2 Breakfast in hotel and individual transfer to starting point of excursion for a detailed briefing on the use of quad bikes and practical advice from the guide. Half way along the route there is a scheduled stop-off during which participants can take a rest, drink or eat should they wish. Participants riding a double quad can swap over so their partner gets to drive. The planned route is 35 km., duration 3 hours. Recommended clothing: hiking shoes/boots or trainers, full-length trousers (jeans preferably), t-shirt (no shirts) and gloves. Outings may be postponed in the event of adverse weather conditions which may compromise excursion safety. Return to hotel: individual transfer.

day 3 Breakfast at hotel and individual transfer to Calcinato. Anyone over the age of 12 can experience the thrill of a ride in a glider. A tourist flight with trailer at an altitude of 1000 m lasts approximately half an hour, whereas a flight at 750 m lasts approximately 20 minutes. Gliding means flying on board a sailplane without the use of mechanical propulsion devices. A good glider sees the air all around as an energy source which can fuel their entire flight. Return of participants: individual transfer, end of services.

Price includes:

- Accommodation in Hotel of choice in double room
- 35 km quad ride, duration 3 hours, in the Ticino area
